ART UNIT 137-1731

Art Unit: 1731

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James V. Suggs on July 10, 2003.

The application has been amended as follows:

Claims 21-23 have been canceled.

In claim 9, line 1, "7" has been changed to – 2 – and after "wherein" the following has been inserted – the precursor is aluminum acetylacetonate, and wherein --.

Newly submitted claims 21-23 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: (See Restriction below). Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21-23 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 7-10, drawn to a method, classified in class 65, subclass 416.
- II. Claims 21-23, drawn to a method, classified in class 430, subclass 4.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1731

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as preparing an optical fiber perform and then drawing an optical fiber. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Derrington whose telephone number is 703 308-3832. The examiner can normally be reached on 8:30am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 703 308-1164. The fax phone numbers for the organization where this application or proceeding is assigned are 703 305-7718 for regular communications and 703 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308 0661.
